### MiTEC and HEAD UP DISPLAY

Mitsubishi Motors Intuitive Technology (MiTEC) is an integrated system of brilliant innovations in action, working in unison to guide and protect, alert and connect, and even entertain. One of those features is the Head Up Display which conveys vehicle information in full colour above the instrument cluster for easy viewing. The easy-to-see display provides relevant vehicle information within the driver's field of view, requiring minimal eye movement for safer driving. You can adjust image brightness and display height to suit your preference and time of day. The Head Up Display extends or retracts when you turn the ignition on or off.

### INVECS-III CVT AUTO TRANSMISSION

Coupled to the MIVEC engine, the INVECS-III automatic CVT (Continuously Variable Transmission) with its Sports Mode delivers effortless acceleration from any speed, slicker gear changes and a smoother ride. Keeping the engine at optimum performance at all times, the CVT provides improved fuel efficiency and lower emissions. A smooth ride provides a comfortable driver experience, making everyday travelling and road trips relaxing thanks to exceptional space and luxurious style.

### PANORAMIC TILT AND SLIDE SUNROOF\*

The GLS Exceed model is fitted with a panoramic sunroof to enjoy the landscape wherever you drive. This feature comes standard with a UV protective coating, LED illumination with brightness settings as well as an electrically operated cover which can be closed with the touch of a button.
